FLEXIBLE WORKING TIME MODEL

We firmly believe that a flexible working time model enables a better work-life balance and helps to get work done more effectively and efficiently. That is why we have a tried and tested flexitime model, which provides for core working hours from 09:00 to 15:00. During this time, we ask all colleagues to be present to ensure communication between departments. Outside of the core working hours, you can organise your working hours freely in coordination with the respective department. This means that private appointments can be easily arranged before or after work and you can really use your holiday to relax.
